Adobe Photoshop CS6 Basic: A Step-by-Step Tutorial Nancy is a fairly accomplished artist and photographer, but she's never owned a copy of Photoshop until now. In this tutorial, she'll take you step by step through Photoshop CS6. We don't assume you know Photoshop. With a little practice, you'll quickly become a proficient Photoshop user. The reason this is a basic tutorial is because we're assuming that you know how to work with a graphics program on your computer. You won't be learning Photoshop here; you'll learn the steps for creating a new document, making selections, and applying effects and other operations. Getting Started with Photoshop CS6 In Figure 4-1, you see a blank Photoshop document with a small eye icon. **Figure 4-1:** Begin any new Photoshop image editing session with a blank document. Photoshop is a powerful tool for creating and manipulating images. You can use it to produce artwork, images for websites, or even retouching images from your camera. The basic steps are these: Open the program. This step is done by clicking the Photoshop icon on your computer's toolbar. You see a black screen with the Adobe logo in the center. While in the opening screen, you can click the file menu icon at the far right and choose any of the supported image file types. Choose a document type. You don't need a file of any specific type; the file format just provides a place to save your image at the end of the editing process. You can save files as TIFF, JPEG, EPS, or PNG. Make any editing changes. You can make any changes you want, but in this step you just create a new document. Creating a New Document A new document is created when you create a Photoshop file. An image is created in Photoshop by making the initial selection of the object that's to be the subject of your image. This subject can be a person, a cartoon character, any object, or even an image you created in another graphics program. You have the choice of using a regular image file or choosing an image saved in one of Photoshop's supported file types. You can also save a new image in Photoshop using the Save As command. However, you'll learn how to create a new document later in this chapter

For the first time in nearly two years, the nation's oil companies have posted higher profits in 2016 as a result of higher oil prices and less crude production, according to data released this week. Oil prices hit a high of almost \$50 a barrel last week, pushed higher by a strengthening U.S. dollar, the European Central Bank's pledge to keep interest rates low for an extended period, and concerns about output at the Organization of Petroleum Exporting Countries (OPEC), the international oil cartel. Prices have fallen back in recent weeks and are currently trading at around \$45 a barrel. However, prices have continued to rise, even as crude production has declined. By contrast, in 2015, the last year in which U.S. output hit record highs, profit margins were depressed by high oil prices. In addition, investors are now willing to pay more for companies with lots of oil reserves. And several companies have increased the cash dividends they pay to shareholders by a total of about \$20 billion in the current year. This hasn't happened since the years after the financial crisis, when investors were willing to pay higher prices for companies with lots of corporate assets. But the cash dividends are likely to remain high for the near term. Oil companies are expected to increase their quarterly cash dividends, with investors bidding up stock prices. In the United States, the average price per share of a company's stock is about 10 percent higher than what the average stock is trading for around the world, according to stock analysts, and investors have kept their portfolios very liquid. Nevertheless, the rise in oil prices has been at the expense of weaker profits for companies with oil rigs and wells. Exxon Mobil's profit margin, an important measure of profitability, dropped to minus 0.09 percent in the first quarter from a minus 0.04 percent in the same period a year ago, according to its annual report. As recently as two years ago, Exxon's profit margin was around minus 0.2 percent. One reason for the strong profit margins is that Exxon isn't producing much oil in the United States, because a settlement with the federal government over alleged emissions has delayed the Keystone pipeline. Exxon is also spinning out its unit in Oklahoma, where it has fracking rigs and wells. Executives told shareholders during the company's annual meeting in March that

What's New in the Photoshop 2022 (Version 23.4.1)?

Archives Tag: hope My first two years as a pastor were maybe the best of my life. I was married to Daniella and we were in our first real job in ministry together. We became part of a team of pastors, who worked mostly together but also worked with other churches, getting them up and started up. It was a lot of work, but a lot of joy. My first year of that time was spent mostly at Luton Baptist Church in Luton, Virginia. Luton's Black population comprised less than one percent of the city, yet the church was known for its excellent ministries for blacks, especially in music and education. We were about to move to a brand new church and a brand new home. We were excited. I served there for one of my closest friend's most touching weddings. It was right after 9/11. My friend's wife was from Charleston, South Carolina and together they were planning to have their wedding during Christmas. They wanted something special for their loved ones who were in the area at the time. They planned a party and asked Daniella to be the music minister for the church. So she did. Daniella loves music, and she loved that church. When it came time for the wedding, Daniella told them she'd be happy to perform a wedding, but only if it was in her home town. The wedding took place right outside of Charleston, where they set the scene for the wedding like they were in the time of romance. They performed two songs that Daniella learned to play just for the wedding, played by the old men on stage - spirituals. On the day of the wedding, she played on stage with a conductor to get the music going. She was overwhelmed with the love, and the congregation joined in the worship. Daniella cried. I cried. We all cried.

I still have that christening gown. It's one of the few things I have kept from my time as a young pastor. That congregation and those church members were some of the very first people I ever met who told me they believed in me and in my ability to do the job. It still makes me cry, especially now that I consider myself more settled and less visionary. I am still basically searching out my vision for who I am and what I should be doing. I wish I could visit that church in Charleston to tell them what I appreciate about
